# Mental health in workplace and the associated business costs

1 According to AIA's Healthiest Workplace survey in 2018, organisations in Malaysia have suffered on average **73.1 days** of loss in work time per employee due to absenteeism at an average cost to employer of **RM2.27 million** per year.

It was also discovered that **50.2%** of employees have at least one dimension of **work-related stress**; which may eventually lead to poor mental health.

The path of poor mental health in workplace

2 On a **national** level, poor mental health in workplace may employers **RM946 per worker** per annum or a total cost of **RM14.46 billion** or **1% of Malaysia's total GDP**.

At an **organisational** level, it was reported that mental health issues could cost **Petronas and Nestle Malaysia RM123 million** and **RM13 million** respectively while for **civil service**, it could even escalate to **RM2.03 billion**.

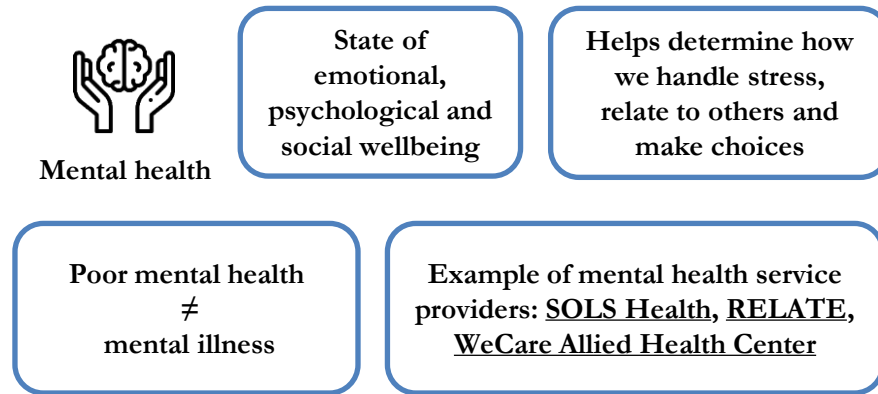

|                   | Average cost per employee | Total cost to Malaysian employers (RM billion) | Percentage of total cost (%) |
|-------------------|---------------------------|--|------------------------------|
| Absenteeism       | RM214                     | 3.28   | 22.68                        |
| Presenteeism      | RM644                     | 9.84   | 68.04                        |
| Turnover          | RM88                      | 1.34   | 9.28                         |
| <b>Total cost</b> | <b>RM946</b>              | <b>14.46</b>                                   | <b>100</b>                   |

Estimated cost of mental health issues to estimated total workforce in 2018

|                             | PETRONAS       | Nestlé (Malaysia) | Large enterprises | Medium SME    | Small SME    | Civil service    |
|-----------------------------|----------------|-------------------|-------------------|---------------|--------------|------------------|
| Average number of employees | 48,000         | 5,267             | 227               | 66            | 12           | 1.6 mil          |
| Absenteeism (RM)            | 28 mil         | 3 mil             | 49,760            | 11,553        | 1,808        | 461 mil          |
| Presenteeism (RM)           | 84 mil         | 9 mil             | 149,281           | 34,660        | 5,424        | 1,382 mil        |
| Staff turnover (RM)         | 11 mil         | 1 mil             | 20,530            | 4,767         | 746          | 190 mil          |
| <b>Total cost (RM)</b>      | <b>123 mil</b> | <b>13 mil</b>     | <b>219,571</b>    | <b>50,980</b> | <b>7,978</b> | <b>2,033 mil</b> |

Estimated cost of mental health issues at an organisational level

## 1 What exactly is mental health?

## 3 Mental health stigma in Malaysia

**Portrayal of media**  
 Negative portrayals such as misrepresenting the realities of mental health in fictional stories have pictured mentally ill character as being “crazy”.

**Cultural beliefs**  
 Cultural backgrounds dominated by religious or spiritual beliefs usually perceive mental health problems with demon possession, divine punishment or sickness of the soul.

**Inaccurate perception**  
 Belief that only weak people succumb to mental issues where sufferers are labelled as crazy, weak, over-sensitive, lacking in faith or over-dramatic.

## 2 Causes and effects of poor mental health & common mental illnesses

| Causes  | Effects (–)  | Common mental illnesses  |
|---|--|--|
| <ul style="list-style-type: none"> <li>Severe / long-term stress or poor health condition</li> <li>Unemployment or poor housing</li> <li>Childhood / adult abuse, trauma or neglect</li> <li>Social isolation, discrimination or loneliness</li> <li>Social disadvantage (e.g. poverty / debt)</li> </ul> | <p>General</p> <ul style="list-style-type: none"> <li>Quality of life / life satisfaction</li> <li>Social problems</li> <li>Health complications</li> </ul> <p>Workplace</p> <ul style="list-style-type: none"> <li>Productivity</li> <li>Burnout</li> <li>Turnover intention</li> <li>Job satisfaction</li> </ul> | <ul style="list-style-type: none"> <li>Anxiety</li> <li>Depression</li> <li>Eating disorders</li> <li>Bipolar disorders</li> <li>Post Traumatic Stress Disorder (PTSD)</li> <li>Obsessive-compulsive disorder (OCD)</li> <li>Psychotic disorders (e.g. schizophrenia)</li> </ul> |

## 4 The state of mental health in Malaysia

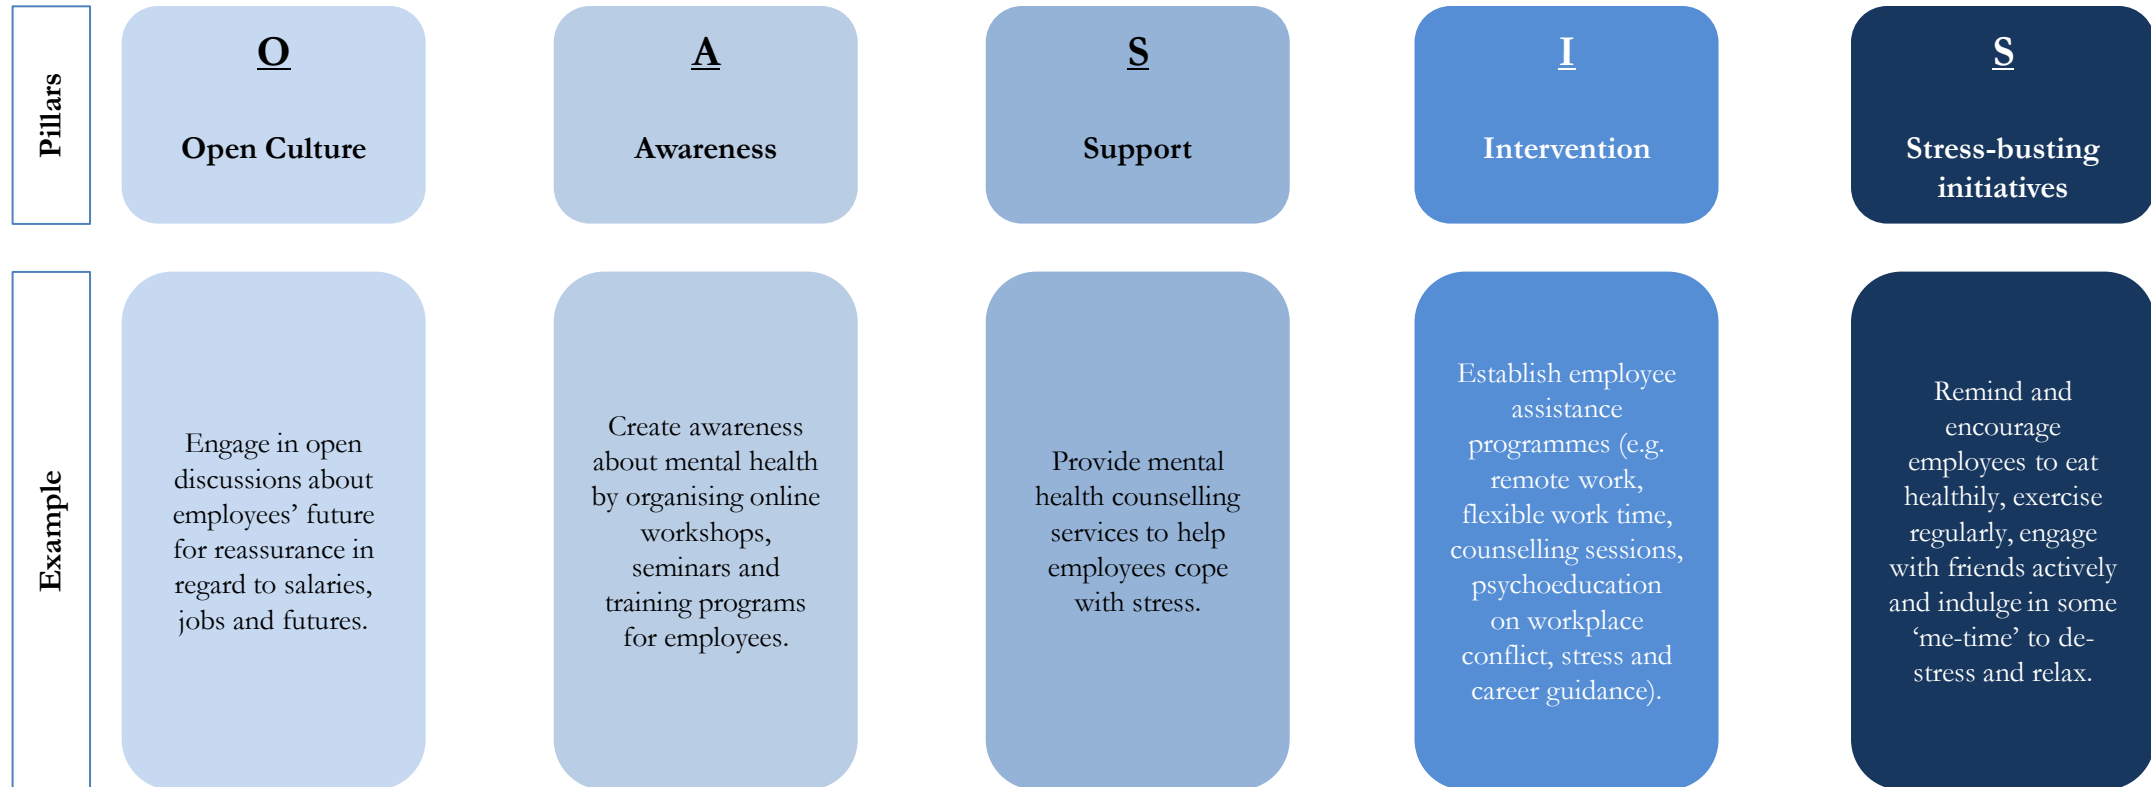

**En route to becoming the second largest illness**  
 According to the 2015 National Health Morbidity Survey, mental health conditions or mental illnesses are expected to rise as the second biggest health issue after heart disease this coming 2020.

**300% increase in the number of patients from 2018 to 2019**  
 According to Women, Family and Community Development Social Welfare Department (JKM), there was an increase from 671 people in 2018 to 1,929 people in 2019 attending public psychological and counselling services.

**Malaysians’ knowledge, beliefs and attitudes about mental health**  
 63.2% find it hard to talk to someone with mental health problems, 62.3% would not want their mental health problems (if they do suffer from it) to be known to the public and 61% people believe that mental health patients should be blamed for their own condition. [n=587]

# How organisations can maintain employee mental health

## OASIS

# Organisational trends in tackling mental health

## Use cases

### Common best practices

#### Flexible work arrangement

- Employees may squeeze in gym time between meetings or attend to other important matters.
- Parents that may need to pick up or drop off their children at school

#### Remote work

- Those working from home get to be closer to their families.
- New parents may need to stay at home to take care of their newborn baby.

#### Physical wellness programme

- E.g. fitness challenge, marathons, or sports & wellness club – Zumba, badminton, yoga, hiking

#### Facilities

- E.g. pantry, gaming room, nursing room, gym, townhall, clinic

- Reduce stress
- Increase productivity
- Prevent workplace burnout

- Maintain low turnover rate
- Attract and retain the female workforce

### Other best practices

Mindvalley

Conspex Group of Companies

Dell

Yayasan Pahang

In-house coaching and therapy / EAP therapy / Counselling sessions

Workplace optimisation

Family-invited events

Mental health assessment

Online learning platform

Annual team engagement

Mental wellness workshops

Herb garden

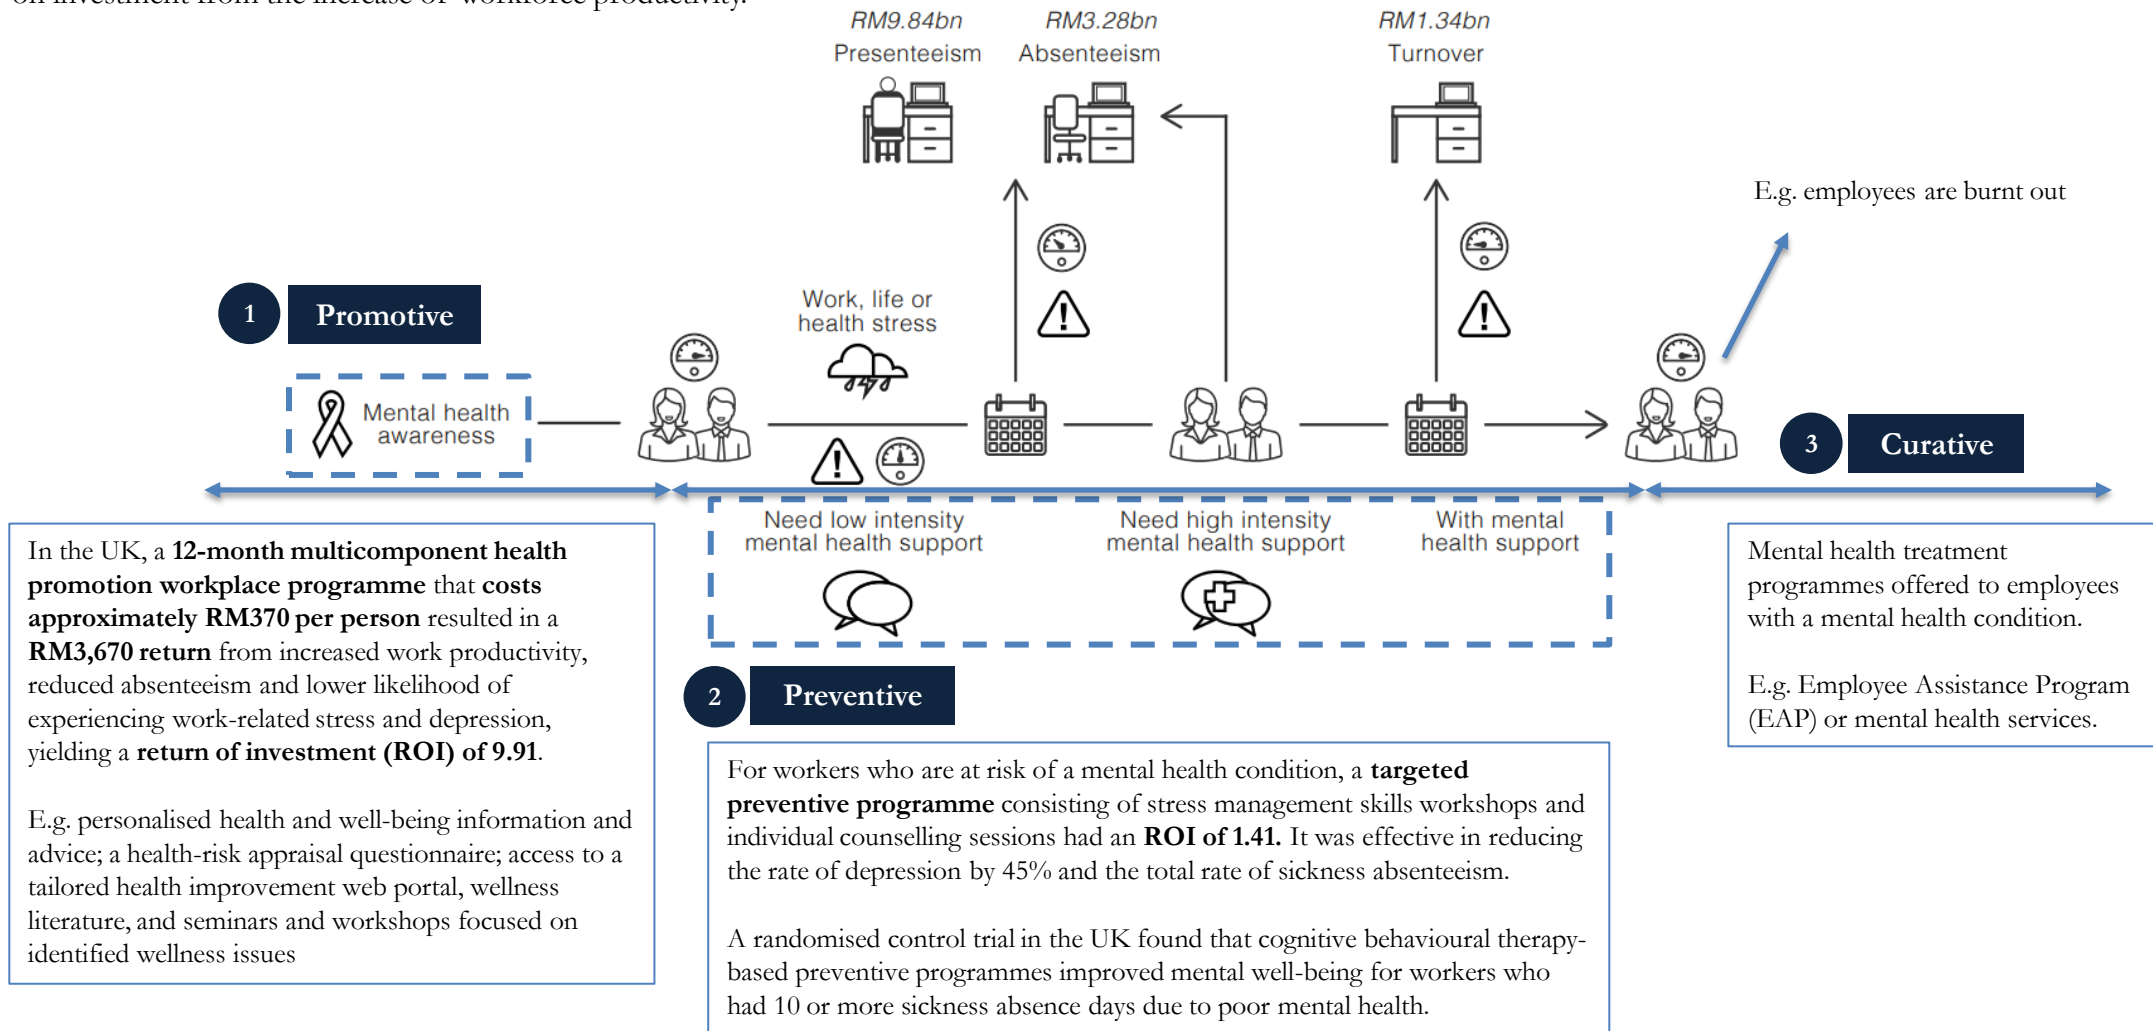

30-day paternity leave

Social activities

# Why should we focus on promotive & preventive rather than curative?

In the diagram below, the process is segmented into three parts where promotive, preventive and curative measures come into place. It is important for organisations to focus on promotive and preventive measures rather than curative and rehabilitative as it could largely reduce the business costs of poor mental health while potentially have a return on investment from the increase of workforce productivity.

## What we can do for you. Consider these three service offerings

### Employee / Organisational assessment

---

- Provide employee satisfaction study (i.e. behaviours and attitudes) in roles and responsibilities in achieving organisational goals and wellbeing
- Ascertain organisational culture impact on employee job performance as well as organisational productivity

### Capacity building

---

- Review state of businesses such as customers, staff, suppliers, stakeholders, learning & development and suggest activities to promote and cultivate good organisational culture

### Strategy roadmap

---

- Facilitate workshop with key team members to provide organisational and business operation alignment
